Important information about parking in the Gateway structure.
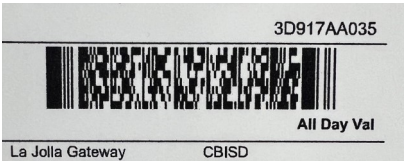

A new operating system has been installed at the Gateway structure adjacent to Beth Israel. Effective immediately, if you pull a parking ticket when you arrive at Beth Israel, please follow these instructions to validate your parking:

1. To validate parking, you must take one of the bar code stickers available at all Beth Israel events. Validation stickers will also be made available in the administrative and school lobbies, sanctuary/social hall foyer, and guard stations. We suggest you affix the sticker to the BACK of your parking ticket. Please be sure you do not obstruct the bar code on the front of your parking ticket. You will need both bar codes to exit.

2. When exiting, scan the parking ticket you received when you entered the parking structure first. Then turn it over and scan the validation bar code on the other side you received at Beth Israel. This will raise the arm to exit.

3. If you have any issues with the parking validation, you should press the call button for assistance.

Step 1—Pull Ticket

Step 2—Affix validation sticker
(On back of parking ticket)

Step 3—Scan Ticket then validation sticker to exit
